Abstract:
One of problems which must be said and most of people are facing with it in cross the globe is hair loss. Several factors such as environmental, genetic, and hormonal and some disease like Thyroid disorders, anemia (low blood), and type of feeding are related to hair loss. Generally, hair creation and coagulation in traditional medicine materials reached the skin and pores that are disposed and disposed materials appears like hair and when this process negligence and deficiency occur then it will interrupt creation and coagulation of hair. This research investigated difference of Phototherapy treatment plant-based, natural remedies (Natrvpaty) and treatment of based traditional health.
