An Investigation of The Satisfaction Level of Executive Units from The
Supreme Audit Court Performance (Case Study: Fars Province)

Saeed Gholami
M.A Student of Change Management, Member of Audit Committee of Fars Supreme Audit Court

Abstract

Nowadays, the use of regulatory tools and devices in order to improve executive
performance and the extent of the volume of turnover in the country is more crucial than
ever, so as, with the use of the regulatory and audit, the amount of violations declined
dramatically. Supreme Audit Court, as one of the most important regulatory bodies is
responsible for monitoring the financial performance of the administrative system of the
country. Since there are interaction between the executive and the Supreme Audit Court in
many working fields, the satisfaction of the Court in order to improve executive
performance and also improve corporate communications (due to the establishment of audit
committees in the executive, is necessary and essential. So this research aims to investigate
the executive satisfaction with the performance of Supreme Audit Court of Fars province,
using multiple regression and Pearson correlation coefficient of the variables. Information
was collected using a questionnaire. The results suggest the implementation of a relatively
high satisfaction with the performance of the Audit Court.
